Hiring Team  
Infrabyte Consulting

### Subject: Application for Data Science Intern — Python | Data Analytics | ML | Visualization

Dear Hiring Team,

I am writing to express my strong interest in the Data Science Intern position at Infrabyte Consulting. As an MCA student at Institute of Management Studies, Noida, with a BCA foundation and multiple NPTEL Elite certifications in Python for Data Science, Data Analytics with Python, and Mathematical Foundations of Machine Learning, I am confident in my ability to contribute meaningfully to your data-driven projects from day one.

My hands-on project experience directly aligns with your requirements. In my Her Health AI System — a women's healthcare analytics platform — I independently collected, cleaned, and structured multi-dimensional health datasets; built analytics modules to identify trends and generate personalized insights; and implemented automated PDF report generation to communicate findings clearly to end users. This end-to-end experience mirrors the core responsibilities outlined in this role, from data collection and cleaning through to dashboards and documentation.

Technically, I am proficient in Python with strong command of Pandas, NumPy, and Matplotlib for data manipulation and visualization. I have working knowledge of MySQL and SQL querying for structured dataset management, and exposure to Tableau and Excel-based dashboards for reporting. My NPTEL certification in Data Structures and Algorithms, combined with my academic grounding in statistical analysis, equips me to approach data problems with both rigor and efficiency.

Beyond technical skills, I bring the independent work ethic essential for a remote internship. Across all three of my projects, I maintained project documentation, collaborated on cross-functional modules, and delivered analytical records — directly matching your documentation and remote collaboration requirements.

I am excited by the opportunity to contribute to Infrabyte Consulting's data science workflows, deepen my practical exposure, and grow alongside a structured program. I am available immediately and eager to make a measurable impact during the internship duration.

Thank you for your time and consideration. I look forward to the opportunity to discuss how my skills align with your team's needs.

Sincerely,

**Tannu Kaushik**

## SECTION 02 | RECRUITER OUTREACH EMAIL

**Subject:** Data Science Intern Applicant — Python, Pandas, ML | MCA Student | Available Immediately

Dear Recruiter,

I am Tannu Kaushik, an MCA student (2024–2026) specializing in data analytics and Python-based data science. I came across the Data Science Intern opening at Infrabyte Consulting and wanted to reach out directly — my profile is a strong match for this role.

Here is a quick snapshot of what I bring:

- 4 NPTEL Elite certifications — Python for Data Science, Data Analytics with Python, ML Foundations, and OOPs with Python
- Hands-on projects using Pandas, NumPy, Matplotlib, Flask, MySQL — applied to real datasets
- Experience building analytics modules, automated reports, and data dashboards from scratch
- Remote-ready: all three of my projects were independently managed with full documentation

I am available to start immediately for a full-time internship and am comfortable working in a fully remote setup.

I have attached my resume for your review. Would it be possible to schedule a quick 10-minute call to discuss how I can contribute to your team?

Best regards,

**Tannu Kaushik**

## SECTION 03 | HIRING MANAGER EMAIL

**Subject:** Data Science Intern Application — Tannu Kaushik | Python, Analytics, Visualization

Dear Hiring Manager,

I am reaching out regarding the Data Science Intern position at Infrabyte Consulting. I am an MCA student with a focused background in data analytics, Python data science libraries, and end-to-end project experience — and I believe I can add real value to your team's ongoing data projects.

What sets me apart is that I have not just studied data science — I have applied it. My Her Health AI System project required me to collect and clean complex multi-dimensional health datasets, build trend-identification modules using Pandas and NumPy, generate automated PDF reports for end users, and maintain thorough project documentation throughout the lifecycle. This is exactly the kind of work your team is looking to get done.

My technical foundation includes:

- Python (primary) — Pandas, NumPy, Matplotlib
- Tableau and Excel dashboards for visualization and reporting
- MySQL and SQL querying for structured data management
- 4 NPTEL Elite certifications directly relevant to this role

I am enthusiastic about contributing to Infrabyte's data science projects, learning from your team, and delivering results in a remote environment. I would welcome the chance to discuss how my background fits your current needs.

Please find my resume attached. I am happy to share my project work or arrange a conversation at your convenience.

Warm regards,

**Tannu Kaushik**

## SECTION 04 | LINKEDIN CONNECTION REQUEST (MAX 300 CHARACTERS)

Hi [Name], I am a Python & data science enthusiast (MCA, NPTEL Elite certified) applying for the Data Science Intern role at Infrabyte. Would love to connect and learn more about the team!

*(Character count: ~230 — within LinkedIn's 300-character limit)*

## SECTION 05 | REFERRAL REQUEST MESSAGE

Hi [Contact's Name],

I hope you are doing well! I recently came across a Data Science Intern opening at Infrabyte Consulting and noticed your connection there. I wanted to reach out to see if you might be open to referring me or sharing any insights about the team.

Quick background: I am an MCA student with hands-on Python and analytics experience, 4 NPTEL Elite certifications in data science, and project work covering data cleaning, trend analysis, and dashboard reporting — all directly aligned with this role.

I completely understand if this is not feasible, and there is absolutely no pressure. I just thought it was worth asking since your recommendation would mean a lot. I have attached my resume for reference.

Thank you so much for considering it — and for any advice you might share about Infrabyte!

Warm regards,

**Tannu Kaushik**

## SECTION 06 | FOLLOW-UP EMAIL (SEND AFTER 5 DAYS IF NO RESPONSE)

**Subject:** Following Up — Data Science Intern Application | Tannu Kaushik

Dear [Hiring Manager / Recruiter Name],

I wanted to follow up on my application for the Data Science Intern position at Infrabyte Consulting, which I submitted on [Application Date]. I remain very enthusiastic about the opportunity and would love to contribute to your team's data science projects.

I understand hiring decisions take time, and I did not want my application to get lost in a busy inbox. I am available to connect for a brief call or answer any questions you may have about my background.

To quickly recap my fit: I am an MCA student with hands-on Python data science project experience, proficiency in Pandas, NumPy, and Matplotlib, Tableau exposure for visualization, and four NPTEL Elite certifications in Python for Data Science and Analytics — all directly relevant to this internship.

Thank you for your time. I look forward to hearing from you and am available at your earliest convenience.

Best regards,

**Tannu Kaushik**

## SECTION 07 | 30-SECOND PROFESSIONAL INTRODUCTION

Hi, I am Tannu Kaushik — an MCA student specializing in data science and analytics. I have hands-on experience working with Python, Pandas, NumPy, and Matplotlib across multiple academic and personal projects, including building a healthcare analytics platform that involved collecting and cleaning real datasets, identifying health trends, and generating automated data reports for users.

On the certification side, I hold four NPTEL Elite badges in Python for Data Science, Data Analytics with Python, Mathematical Foundations of Machine Learning, and OOPs with Python — so my learning is both structured and verified. I also have exposure to Tableau, SQL, and Flask for full-stack data workflows.

I am currently looking for a data science internship where I can apply these skills on real business problems, contribute to analytics and reporting projects, and grow into a well-rounded data professional. I am remote-ready, self-driven, and genuinely excited about working with data at scale.

## SECTION 08 | TOP 10 JOB TITLES BEST SUITED FOR YOUR PROFILE

1. Data Science Intern
2. Data Analyst Intern
3. Python Developer Intern (Data Focus)
4. Business Intelligence Intern
5. Machine Learning Intern
6. Data Engineering Intern (Entry Level)
7. Analytics Engineer Intern
8. Reporting & Insights Intern
9. Research Analyst Intern (Data)
10. Junior Data Analyst / Fresher Analyst

## SECTION 09 | KEY STRENGTHS RECRUITERS WILL NOTICE

### ► NPTEL Elite Pedigree

Four NPTEL Elite certifications — Python for Data Science, Data Analytics with Python, ML Foundations, OOPs with Python — signal academic rigour and structured, verified learning beyond a typical fresher.

### ► End-to-End Project Ownership

Built the Her Health AI System from data collection through cleaning, trend analysis, automated reporting, and documentation — not a tutorial clone but a real analytics platform.

► **Full Data Stack Capability**

Proficient across the full data workflow: Python (Pandas, NumPy, Matplotlib) for analysis, MySQL for data storage, Tableau and Excel for visualization, Flask for serving data applications.

► **Documentation Discipline**

Consistently maintained project documentation across all three projects — a rare and highly valued trait in data science candidates that signals professionalism and team-readiness.

► **Remote-Ready & Self-Directed**

All projects were independently developed, demonstrating the self-management and async communication skills essential for remote data internships.

► **Analytical Reasoning Under Pressure**

Qualified for the North Zonal Finals of the National Inter-College Crossword Expedition — an unexpected but genuine signal of sharp analytical reasoning.

SECTION 10 | SKILL GAP ANALYSIS

Current Strengths

|                                                    |                                |                                      |
|----------------------------------------------------|--------------------------------|--------------------------------------|
| Python (Primary)<br>Matplotlib<br>Excel Dashboards | Pandas<br>SQL / MySQL<br>Flask | NumPy<br>Tableau<br>Jupyter Notebook |
| Data Cleaning                                      | Statistical Analysis           | ML Fundamentals                      |
| Data Visualization                                 | Documentation                  | Remote Collaboration                 |

Missing / Gap Skills

| Skill Gap                   | Why It Matters              |
|-----------------------------|-----------------------------|
| Seaborn / Plotly (adv. viz) | NLP basics                  |
| Scikit-learn (applied ML)   | Feature engineering         |
| Power BI                    | API integration             |
| EDA frameworks              | Streamlit / Dash            |
| Git / GitHub                | Statistical testing (SciPy) |
| Cloud basics (GCP/AWS)      | Big Data intro (Spark)      |

Recommended Learning Roadmap

| Phase    | Focus Area    | Action Items                                                                 |
|----------|---------------|------------------------------------------------------------------------------|
| Week 1–2 | Visualization | Learn Seaborn & Plotly Express; recreate your Matplotlib charts with Seaborn |

|           |                 |                                                                                       |
|-----------|-----------------|---------------------------------------------------------------------------------------|
| Week 3–4  | Applied ML      | Scikit-learn: train/test splits, linear regression, decision trees on Kaggle datasets |
| Week 5–6  | Version Control | Git & GitHub: push all 3 projects to public repos with README files                   |
| Week 7–8  | Power BI        | Microsoft Learn free Power BI path; build 1 dashboard from your Cafe project data     |
| Week 9–10 | Stats Testing   | SciPy for hypothesis testing; Kaggle EDA competitions                                 |
| Ongoing   | Portfolio       | Build a Kaggle profile; publish 2 EDA notebooks; add GitHub link to resume            |

## SECTION 11 | PERSONAL BRAND SUMMARY

### Unique Value Proposition

*I am an MCA-level data science practitioner with verified, multi-certification expertise and real project proof — not just coursework. I have built analytics platforms that collect, clean, and transform raw data into actionable insights and automated reports, end-to-end. My combination of Python depth, Tableau and SQL breadth, and a self-directed work style makes me a plug-in contributor for any data internship or analytics team.*

### Professional Positioning Statement

Tannu Kaushik is an emerging data science professional — an MCA candidate with 4 NPTEL Elite certifications and hands-on project experience spanning data collection, cleaning, analytics, visualization, and reporting. She bridges technical rigour and practical delivery, having built real-world data pipelines and analytics modules independently. She is actively seeking a data science internship where she can contribute to data-driven projects and accelerate her growth.

### Recruiter Headline

**Data Science Intern | Python • Pandas • NumPy • Matplotlib • Tableau • SQL | 4x NPTEL Elite Certified | End-to-End Analytics Project Experience | Remote-Ready**

## SECTION 12 | INTERVIEW TALKING POINTS

### Most Impressive Achievements to Lead With

- 4 NPTEL Elite certifications in data science domains — demonstrate structured, verified learning beyond classroom content
- Her Health AI System: end-to-end analytics platform with data collection, cleaning, trend identification, automated PDF reports, and an AI chatbot for data querying — a fresher-level project with professional-grade scope
- North Zonal Finals qualifier, National Inter-College Crossword Expedition — signals sharp analytical reasoning under competition conditions

### Key STAR Stories to Prepare

| Story Theme   | What to Cover                                                                                                                                                                |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Data Cleaning | In Her Health AI, I worked with multi-dimensional health data across menstrual cycles, symptoms, mood, and lifestyle. The raw data had inconsistencies and missing values. I |

|                                      |                                                                                                                                                                                                                                                                             |
|--------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                      | used Pandas to clean and structure it, then validated data accuracy before analysis — result: a reliable dataset that powered the entire analytics module.                                                                                                                  |
| <b>Trend Identification</b>          | Using the structured health dataset, I built an analytics module that explored patterns across user data to generate personalized health insights. Describe the Pandas operations you used (groupby, filtering, aggregation) and how insights were surfaced to users.       |
| <b>Visualization &amp; Reporting</b> | I implemented automated PDF report generation that translated analytical findings into health summaries for end users — turning raw data into readable, actionable outputs. This maps directly to Infrabyte's dashboard and reporting responsibilities.                     |
| <b>Independent Work</b>              | All three of my projects were independently developed and documented. I managed my own timelines, debugged issues autonomously, and maintained full project records — preparation for exactly the kind of remote, self-directed internship environment Infrabyte describes. |
| <b>Learning Agility</b>              | When I needed to integrate an AI chatbot into Her Health AI, I researched and implemented the feature independently — demonstrating the ability to learn new techniques on the job and deliver working solutions.                                                           |

## Areas Recruiters Are Likely to Probe — Be Ready

- "Walk me through one of your data projects end to end." → Use Her Health AI, cover all 5 phases: collection, cleaning, analysis, visualization, reporting.
- "What Python libraries have you used and for what?" → Pandas for data manipulation, NumPy for numerical ops, Matplotlib for charts; give specific examples from projects.
- "Do you have any experience with machine learning?" → Yes: NPTEL Mathematical Foundations of ML certification; applied ML concept via the AI chatbot in Her Health AI; basic familiarity with ML workflow via Python for Data Science course.
- "How do you handle working independently?" → All 3 projects built solo; maintained documentation; describe your workflow and time management approach.
- "Do you know SQL?" → Yes: MySQL for all three projects — designed schemas, wrote queries, managed relational data for order records, health data, and student profiles.
- "Where do you see yourself in 3 years?" → Growing into a senior data scientist or ML engineer role, with this internship as the foundation of real-world industry experience.
